1 Doma 6_Application Administrator Manual_01_Introduction

1	Introduction	7
1.1	Arco DocRoom	8
1.2	Arco Routing.....	9
1.2.1	Procedure design	10
2	Glossary	12
3	Doma tools	14
3.1	Webinterface	14
3.2	Doma admin module	15
3.2.1	Introduction	15
3.2.2	Login	16
3.2.3	Startup screen.....	17
3.3	Doma Explorer	23
3.3.1	Introduction	23
3.4	GenCD	23
3.4.1	Introduction	23
3.4.2	Installation	23
3.4.3	Configuration.....	23
4	Doma Licence.....	25
5	About files, categories and packages	26
6	Icons used in the Doma WebInterface.....	27
6.1	Icons in the result list of the Webinterface	27
6.1.1	Document icons	27
6.1.2	Folder icons	30
6.1.3	Workflow icons.....	33
6.1.4	Dossier icons	35
6.1.5	Icons in Routing WorkFlow	35
7	Constants in Doma 6.....	36

2 Doma 6_Application Administrator Manual_02_User Management

1	User Management.....	7
1.1	Introduction.....	7
1.2	User management in the Doma WebInterface.....	8
1.2.1	Introduction	8
1.2.2	Users.....	8
1.2.3	Groups	11
1.2.4	Roles	11
1.3	User Management in the Doma admin module	15
1.3.1	Introduction	15
1.3.2	Manual user synchronization	15
1.3.3	Automatic user synchronization.....	18
1.3.4	User synchronization settings	18

3 Doma 6_Application Administrator Manual_03_Files

1	Introduction.....	8
2	File extensions.....	9
2.1	General.....	9
2.2	File extension parameters.....	12
3	File Servers	14
3.1	General.....	14
3.2	File server Configuration	15
	Next to the default installed file servers, one can create an implementation of a custom fileserver 5(see programming Guide).....	16
3.3	Using a file server	16
4	Rendition Servers	17
4.1	General.....	17
4.2	Rendition server configuration	18
4.3	Using a rendition server	19
5	OCR.....	20

4 Doma 6_Application Administrator Manual_04_Properties and Edit checks

1	Properties	5
1.1	Introduction.....	5
1.1.1	Definition	5
1.1.2	Different kinds of properties	5
1.1.3	Property types	8
1.2	General Configuration	9
1.2.1	Introduction	9
1.2.2	Basic configuration.....	9
1.3	Property types	14
1.3.1	Assignee	14
1.3.2	AutoNumber.....	20
1.3.3	Boolean.....	22
1.3.4	CodeLookup	24
1.3.5	Currency.....	39
1.3.6	Date.....	41
1.3.7	DateTime.....	42
1.3.8	Decimal	45
1.3.9	Email	47
1.3.10	ExternalLookup	49
1.3.11	Configuration.....	49
1.3.12	Output in the web interface	50
1.3.13	Hidden.....	55
1.3.14	Html.....	56
1.3.15	List.....	58
1.3.16	Lookup.....	60
1.3.17	Managed List	74
1.3.18	Number	77
1.3.19	String.....	79
1.3.20	Tab	81
1.3.21	Table	82
1.3.22	Vessel	92
1.3.23	Webservice	104
1.4	Availability of properties in categories, procedures and dossiers	111
1.5	Appendix Code Examples	112
1.5.1	Code lookup example code	112
1.5.2	Externallookup, single select example code.....	115
1.5.3	Externallookup, Multi select example code.....	116
1.5.4	Web service example code.....	118
2	Edit-Checks	119
2.1	Configuring edit-checks.....	119
2.1.1	Edit-checks overview	119
2.1.2	Defining an edit-check	121
2.2	Using edit-checks.....	127
2.2.1	Procedure level	127
2.2.2	Category level	128

5 Doma 6_Application Administrator Manual_05_Packages

1	Introduction	7
1.1	Definition	7
1.1.1	DocRoom package	7
1.1.2	DocRoom query package	7
1.1.3	Workflow package	7
1.1.4	Workflow query package	8
1.1.5	Sharepoint package	8
1.2	Application	8
1.2.1	DocRoom package	8
1.2.2	DocRoom query package	8
1.2.3	Workflow package	9
1.2.4	Workflow query package	9
1.2.5	Sharepoint package	10
1.2.6	Packages and dossiers	10
2	Configuration	12
2.1	Add pool package	12
2.2	Add category package	13
2.3	Link pool package to a category	14
2.4	Add procedure package	15
2.5	Edit pool package	16
2.6	Edit category package	17
2.7	Edit procedure package	18
2.8	New package	20
2.9	Edit package	21
2.9.1	Tab Package	21
2.9.2	Tab Translation	24
2.9.3	Tab Categories	25
2.9.4	Tab Screens	25
2.9.5	Tab Content	26
2.9.6	Tab Notes	28
2.9.7	Tab Audit	28
2.10	Delete package	28
3	Use of packages in DocRoom Web	30
3.1	DocRoom package	30
3.2	DocRoom query package	30
3.3	Workflow package	30
3.4	Workflow query package	30
3.5	Sharepoint package	30
4	Use of packages in ACL	31
5	Example	32
5.1	Example with DocRoom and Workflow package	32
5.1.1	Configuration	32
5.1.2	Result in DocRoom Web	36
5.2	Example with DocRoom query package	39
5.2.1	Configuration	39
5.2.2	Result in DocRoom Web	42
5.3	Example with Workflow query package	43
5.3.1	Configuration	43
5.3.2	Result in DocRoom Web	45
5.4	Example with security	46
5.4.1	Configuration	46
5.4.2	Result in DocRoom Web	48

6 Doma 6_Application Administrator Manual_06_Categories

1	Introduction.....	7
1.1	Overview	7
2	General configuration	8

7 Doma 6_Application Administrator Manual_07_Procedures & case categories

1	Introduction	9
2	About Procedures, Workflow Categories and documents with an insert procedure	10
2.1	Introduction	10
2.2	WorkFlow categories	10
2.3	Procedures	10
2.4	Documents with an insert procedure	10
2.5	Overview: procedure vs. workflow category vs. document with insert procedure	11
2.5.1	Document with insert procedure vs. workflow category	11
2.5.2	workflow category vs. procedure	11
2.5.3	When do I use	12
3	Doma admin: Procedures – overview of the procedure configuration screens in the Doma admin module	13
3.1	Open configuration screen	13
3.2	Tab Procedure	14
3.2.1	Icon toolbar	14
3.2.2	Configuration screen	14
3.3	Tab Translation	16
3.4	Tab Properties	17
3.5	Tab Parameters	17
3.6	Tab Edit-checks	18
3.7	Tab Packages	18
3.8	Tab Steps	19
3.9	Tab Screens	19
3.10	Tab Event Actions	19
3.11	Tab User Events	19
3.12	Tab Event Handlers	19
3.13	Tab View	20
3.14	Tab Notes	20
3.15	Tab Audit	20
4	Procedure step types	21
4.1	Steps with user interaction	21
4.1.1	Normal	21
4.1.2	NormalAll	21
4.2	Automatic steps	22
4.2.1	Automatic	22
4.2.2	Trigger	22
4.2.3	External	22
4.2.4	Export	23
4.3	Steps for conditional routing	23
4.3.1	Condition	23
4.3.2	EndCondition	23
4.3.3	Distribution	23
4.3.4	EndDistribution	24
4.4	Steps related to subprocedures	24
4.4.1	SubProc	24
4.4.2	ParentDispatch	24
4.5	Other	25
4.5.1	Start	25
4.5.2	Stop	25
4.5.3	Wait	25
4.5.4	Cancel	25
4.5.5	PreviousStep	25
5	Actions on procedure and steps during configuration	26
5.1	Create a new step	26
5.2	Copy and paste an existing step	27
5.3	Edit a step	29

5.4	Delete a step	29
5.5	Move a step	30
5.6	Move several steps with one movement	30
5.7	Link steps – draw a arrow from one step to another	30
5.8	Remove an arrow between steps	30
5.9	Assign a step to a user	31
5.10	Add properties to a step	32
5.11	Add packages to a step	32
5.12	Configure step lay-out	32
5.12.1	Tab Screen items	32
5.12.2	Tab Screen toolbar	36
6	Doma admin: WorkFlow Categories – overview of the workflow category configuration screens in the Doma admin module	38
6.1	Open configuration screen	38
6.2	Workflow category configuration	39
6.2.1	Icon toolbar	39
6.2.2	Tab Category	39
6.2.3	Tab Translation	40
6.2.4	Tab Properties	41
6.2.5	Tab Parameters	42
6.2.6	Edit-checks	42
6.2.7	Packages	42
6.2.8	Document templates	42
6.2.9	Screens	43
6.2.10	Event actions	43
6.2.11	User events	43
6.2.12	Event handlers	44
6.2.13	Notes	44
6.2.14	Audit	45
6.3	Insert procedure configuration	45
	The configuration of an insert procedure of a Workflow category is the same as the configuration of a 'normal' procedure.	45
7	Doma admin: Document with an insert procedure – overview of the configuration screens in the Doma admin module	46
7.1	How to create a new procedure as an insert procedure for a category	46
7.2	How to link a procedure as an insert procedure to an existing category	48
7.3	How to link a procedure as an insert procedure to a new category	49
8	Daily administration of workflows	50
8.1	Unlock a workflow	50
8.2	Edit the work list of the workflow	50
8.2.1	Add a user to the work list	51
8.2.2	Assign work to a(nother) user	51
8.2.3	Recalculate work of a workflow	52
8.3	Delegate the worklist of a user to someone else	52
8.4	Edit the workflow details	53
8.5	Move a workflow to another step	54
8.6	End a workflow	55
8.7	Delete a workflow	56
8.8	View the dossier history	56
8.9	Search workflows with overdue deadlines	57
8.10	Search workflows assigned to specific users	57
9	Icons used in the Doma WebInterface	58
9.1.1	Icons in the result list of the Webinterface	58
10	Deadlines	59
10.1	Introduction	59
10.2	Configuration	59
10.2.1	On procedure level	59
10.2.2	On step level	60
10.2.3	Parameters that influence the deadlines: holidays and working hours	60
10.3	Deadlines and user interface	61

10.3.1	Screen items related to deadlines	61
10.3.2	Deadlines in result lists	61
10.3.3	Deadlines and application administrators	62
11	Workflow priority	63
11.1	Priority levels	63
11.2	Setting priority on procedure level	63
11.2.1	Checkbox Change priority on Workflow Creation	63
12	Customization: event actions, user events and event handlers	64
13	Security	64
14	Versioning	64
15	Import/export	64
16	User types	65
17	Configuration examples	66
17.1	Step by step example of a simple procedure configuration	66
17.1.1	Introduction	66
17.1.2	Creating the procedure	66
17.2	Step by step example of a simple workflow category configuration	75
17.2.1	Introduction	75
17.2.2	Create a new workflow category	75
17.3	Example of config of event actions	82
17.4	Example of config of conditional step	82
18	Glossary	83

8 Doma 6_Application Administrator Manual_08_Document templates

1	Introduction	7
2	Template creation	7
3	Template configuration in the Arco Doma admin module	8
3.1	Tab document templates overview	8
3.1.1	Input tables	9
3.2	Description of the document template configuration screens	12
3.2.1	Document template configuration tab ribbon	12
3.2.2	Tab Document template	15
3.2.3	Tab Translation	16
3.2.4	Tab Bookmarks	16
3.2.5	Tab Steps	16
3.2.6	Tab Actions	18
4	Import / Export document templates	24
4.1	Import document template	24
4.2	Export document template	25
5	Configuration examples	27
5.1	Example of the creation of a Word document with bookmarks (using Word 2007)	27
5.1.1	Visualize bookmarks	27
5.1.2	Add Bookmarks	27
5.2	Example: using a Word (.docx) template for file creation in a workflow category – file creation is triggered by the WebInterface user – result = file	30
5.2.1	Introduction	30
5.2.2	Template configuration	32
5.2.3	User event configuration on procedure level	33
5.2.4	Add user event to the step	35
5.2.5	Result in the Doma WebInterface:	36
5.3	Example: using a Word (.docx) template for file creation in a workflow category – file creation is triggered by the WebInterface user – result = document with file attached linked in the workflow package	37
5.3.1	Introduction	37
5.3.2	Template configuration	38
5.3.3	User event configuration on procedure level	40
5.3.4	Add user event to the step	42
5.3.5	Result in the Doma WebInterface:	42
5.4	Example: using an Excel (.xls) template for file creation in a document category with steps during creation – file creation is triggered automatically when document is saved – result = document with file attached	44
5.4.1	Introduction	44
5.4.2	Template configuration	45
5.4.3	Result in the Doma WebInterface:	46
6	Troobleshooting	48
6.1	Procedure properties are disabled in Actions configuration screen	48
6.2	No bookmarks available in the field Bookmarks of the part Put output to in the Actions configuration screen	49

9 Doma 6_Application Administrator Manual_09_Messages and E-mail

1	Messages and Emails	7
1.1	Introduction.....	7
1.1.1	Messages and E-mails.....	7
1.1.2	E-mail notifications.....	7
1.1.3	Saving E-mails to Doma	7
1.2	Messages in the Doma WebInterface.....	9
1.2.1	Doma navigation bar – item Mail	9
1.2.2	Prerequisites to send messages.....	14
1.2.3	Send a message from the detail window of a Doma item	14
1.2.4	View all messages sent from the detail window of a Doma item.....	15
1.2.5	Send mail from a detail window of a Doma item	15
1.2.6	Message detail.....	16
1.3	Notification templates – configuration	18
1.3.1	Create a notification template	18
1.3.2	Disable notifications	24
1.4	Subscriptions.....	25
1.4.1	Introduction	25
1.4.2	Configuration of custom subscription messages	25
1.4.3	Batch Job	29
1.4.4	Users and subscriptions.....	30
1.4.5	ArcoInfo parameters	35
1.5	Mail settings	37
1.6	Examples.....	40
1.6.1	Simple notification.....	40
1.6.2	Send notification and save it in Doma	41
1.6.3	Send notification and track this message in Doma.....	42
1.6.4	Subscription	43

10 Doma 6_Application Administrator Manual_10_Managed lists

1	Introduction	6
1.1	What are managed lists? Definition of managed lists - use of managed lists.	6
1.2	Managed lists types	6
1.3	Why create a managed list?	6
1.4	Difference in configuration with other Doma properties	7
2	Configuration	8
2.1	Step 1: Configuration in the Doma admin module: Create a new Managed list	8
2.2	Step 2: Link the managed list to a property	9
2.2.1	Property parameters	10
2.3	Create managed list of the type LIST	11
2.3.1	Why create a managed list of this type?	11
2.3.2	Configuration in the Doma admin module	11
2.3.3	Edit list in WebInterface	12
2.3.4	Configuration of the list items in the web interface	13
2.3.5	Link the managed list to a property so it can be used in a category	13
2.4	Create a managed list of the type CODELIST	14
2.4.1	Configuration in the Doma admin module	14
2.4.2	Configuration of the list items in the web interface	14
2.4.3	Link the managed list to a property so it can be used in a category	15
2.5	Create a managed list of the type UDCLIST	16
2.5.1	Configuration in the Doma admin module	16
2.5.2	Configuration of the list items in the web interface	16
2.5.3	Link the managed list to a property so it can be used in a category	17
2.6	Create a managed list of the type THESAURUS	18
2.6.1	Definition and usage	18
2.6.2	Configuration in the Doma admin module	19
2.6.3	Configuration of the list items in the web interface	20
2.6.4	Link the managed list to a property so it can be used in a category	23
2.7	Create a managed list of the type CONCEPT TREE	25
2.7.1	Configuration in the Doma admin module	25
2.7.2	Configuration of the list items in the web interface	25
2.7.3	Link the managed list to a property so it can be used in a category	26
2.8	Edit a managed list	27
2.9	Delete a managed list	27
2.10	Export a managed list	28

11 Doma 6_Application Administrator Manual_11_Events and Actions

1	Introduction	7
2	Configuration in the Doma admin module	8
2.1	Event actions	8
2.1.1	Definition	8
2.1.2	Events - overview	8
2.1.3	Actions – overview	9
2.1.4	Configuration of Event actions	10
2.2	User events	11
2.2.1	Definition	11
2.2.2	Events	11
2.2.3	Actions	11
2.2.4	Configuration of User events	11
2.3	Configuration of a condition for event actions and user events	13
2.3.1	Create a condition	13
2.3.2	Edit a condition	15
2.3.3	Delete a condition	15
3	Programming – configuration in the Doma admin module	16
3.1	Category type handler	16
3.2	Category event action: execute code	17
3.3	Screen handler	17
3.4	Batch Jobs	18
3.4.1	Definition	18
4	Overview and description of all actions	19
4.1	Category General	19
4.1.1	Cancel	19
4.1.2	Create object	20
4.1.3	Dispatch	21
4.1.4	Execute code	22
4.1.5	Execute User Event	23
4.1.6	Log	24
4.1.7	Move to folder	25
4.1.8	Perform Edit checks	26
4.1.9	Rename	27
4.1.10	Run in elevated mode	28
4.2	Category Notifications	29
4.2.1	Send notification to an assignee	29
4.2.2	Send notification to a mailinglist	30
4.2.3	Send notification to the case creator	31
4.2.4	Send notification to the work list	32
4.3	Category Properties	33
4.3.1	Add to property	33
4.3.2	Hide property	34
4.3.3	Remove from property	35
4.3.4	Set property	36
4.3.5	Set Runtime property	37
4.3.6	Show property	38

12 Doma 6_Application Administrator Manual_12_Screens & Site Management

1	General overview of a DocRoom and Routing environment.....	8
1.1	Application toolbar.....	8
1.2	Application Sites.....	8
1.2.1	Site definitions.....	8
1.2.2	Site menu	9
1.2.3	Tree Pane	9
1.2.4	Result Pane	9
1.2.5	Preview pane	10
1.2.6	Detail window.....	10
2	How can a DocRoom application site be configured from system management point of view.....	11
2.1	Sitemap	13
2.2	Site definition.....	14
2.3	Tree Definition	14
2.4	Menu (xxxMenu.xml).....	18
2.5	Result grid definition.....	26
2.6	GridToolbar definitions	33
2.7	File result grids	36
2.8	Grouping.....	37
2.9	Filters.....	38
2.10	Object tooltip.....	39
2.11	ContextMenus.xml.....	40
2.12	Preview window (PreviewTabs.xml)	44
2.13	Default user preferences (DefaultUserPrefs.xml).....	47
3	Integration.....	50
3.1	URL Integration	50
3.2	Main.aspx file explained	52

13 Doma 6_Application Administrator Manual_13_DRUM

1	DRUM, the Docroom and Routing Upload Module	7
1.1	Introduction.....	7
1.1.1	Definition	7
1.1.2	Configuration of DRUM.....	7
1.1.3	How it works - in brief.....	7
2	DRUM settings	8
3	DRUM Input Connectors	10
3.1	Introduction.....	10
3.2	How to create an input connector	10
3.2.1	Configuration of an IC Database Connector.....	11
3.2.2	Configuration of an IC Dat file Connector.....	16
3.2.3	Configuration of an IC File Upload Connector	18
3.2.4	Configuration of an IC Mail Connector.....	22
3.2.5	Configuration of an IC ISFeed Connector.....	29
3.2.6	Configuration of an IC XML File Connector	31
3.2.7	Configuration of an IC Flat File Connector	36
3.2.8	Configuration of an IC Custom Connector.....	39
3.2.9	Add scenarios and batch job.....	40
3.3	How to edit an input connector.....	43
3.3.1	Edit IC Database Connector	43
3.3.2	Edit IC Dat File Connector	46
3.3.3	Edit IC File Upload Connector	48
3.3.4	Edit IC Mail Connector	50
3.3.5	Edit IC ISFeed Connector.....	54
3.3.6	Edit IC XML File Connector	56
3.3.7	Edit IC Flat File Connector.....	59
3.3.8	Edit IC Custom Connector	61
3.3.9	Tab IC Properties.....	62
3.3.10	Tab IC Settings	63
3.3.11	Tab Scenarios	64
3.3.12	Tab Batch jobs	64
3.3.13	Test Input Stream	67
3.4	How to delete an input connector	68
4	Scenarios.....	69
4.1	Introduction.....	69
4.2	How to create/edit a scenario.....	69
4.2.1	Folder scenario	69
4.2.2	Dossier scenario	73
4.2.3	Document/Mail scenario	77
4.2.4	Workflow scenario.....	87
4.2.5	Configure meta data	97
5	Import / Export.....	99
5.1	Import from zip file.....	99
5.2	Export to zip file.....	99
6	Solution.....	100
6.1	How to add an input Connector to a solution	100
6.2	How to remove an Input Connector from a solution.....	101

14 Doma 6_Application Administrator Manual_14_Security and Action Profiles

1	DocRoom Security	8
1.1	Introduction.....	8
1.2	Main rules.....	8
1.2.1	Users for which we can define folder, document and workflow security	9
1.3	Action profiles.....	9
1.3.1	Overview of all actions	9
1.3.2	How to create an action profile?	12
1.3.3	How to edit an action profile?	12
1.3.4	How to delete an action profile?	13
1.4	Folder security.....	15
1.4.1	Description of the ACL (Access Control List) window of a folder	15
1.4.2	Filter	15
1.4.3	List of available users, groups, roles, properties and packages.....	16
1.4.4	Name of selected folder and name of the parent folder + options.....	16
1.4.5	ACL list of the folder.....	16
1.4.6	Root folder security	17
1.4.7	How to set security on folder level	18
1.4.8	How to view folder security settings.....	18
1.5	Document security	19
1.5.1	Description of the ACL (Access Control List) window of a document	19
1.5.2	Filter	19
1.5.3	List of available users, groups, roles, properties and packages.....	20
1.5.4	Name of selected document and name of the item where it inherits its security from + options.....	20
1.5.5	How to set security on document level	20
1.5.6	How to view document security settings.....	21
1.5.7	Property <i>Assignee</i> and document and folder security	21
1.6	DocRoom Workflow security	23
1.6.1	Introduction	23
1.6.2	Description of the ACL (Access Control List) window of a workflow	23
1.6.3	Filter	24
1.6.4	List of available users, groups, roles, properties and packages.....	24
1.6.5	Name of selected workflow and name of the item where it inherits its security from + options.....	24
1.6.6	How to set security on a workflow	25
1.6.7	How to view workflow security settings.....	25
1.7	Dossier security.....	26
1.7.1	Introduction	26
1.7.2	Description of the ACL (Access Control List) window of a dossier.....	26
1.7.3	Filter	26
1.7.4	List of available users, groups, roles, properties and packages.....	27
1.7.5	Name of selected dossier and name of the item where it inherits its security from + options.....	27
1.7.6	How to set security on a dossier	28
1.7.7	How to view dossier security settings	28
2	Routing security.....	29
2.1	Introduction.....	29
2.2	Procedure security	29
2.2.1	Procedure security levels.....	29
2.2.2	How to set procedure security	33
2.2.3	How to edit procedure security	33
2.3	Step executors	34
2.3.1	Introduction	34
2.3.2	Default step executors	34
2.3.3	Conditional step executors.....	35
2.4	Delegate(d) work.....	39

2.4.1	Introduction	39
2.4.2	How to delegate work	40
2.4.3	How to edit a delegation	41
2.4.4	How to remove a user from my delegated work list.....	42
2.4.5	How to see which users have delegated work to me?	43
2.4.6	How to view work delegated to you	43
In your profile, you can see which users have delegated their work list to you.		43
3	Other security settings.....	44
3.1	Package security.....	44
3.1.1	Introduction	44
3.1.2	Package security definition in the Doma admin module	44
3.1.3	Package security configuration in the DocRoom WebInterface	46
3.2	Security on user events.....	48
3.2.1	How to set security on a user event.....	48
3.3	Security on custom screens.....	50
3.3.1	How to set security on a custom screen.....	50
3.4	Security on saved queries.....	52
3.4.1	How to create a secured query and set security on it.....	52
4	Interesting combinations of security settings	54
4.1	Allow a user to select another user in the WebInterface and give the selected user pre-defined rights on the concerned document or folder	54
4.2	Allow edit without check-in / check-out	54
4.3	Allow edit of document only after check-in / check-out.....	54

15 Doma 6_Application Administrator Manual_15_ArcolInfo and Settings

1	Arco Info	7
1.1	Introduction.....	7
1.2	ArcolInfo parameters.....	8
1.2.1	CATEGORY: DRUM	8
1.2.2	CATEGORY:FullText	10
1.2.3	CATEGORY: General	10
1.2.4	CATEGORY: Interface.....	11
1.2.5	CATEGORY: LDAP	15
1.2.6	CATEGORY: Locations	16
1.2.7	CATEGORY: Mail	18
1.2.8	CATEGORY: OCR.....	19
